

Are you
prepared
for GDPR?

Here's how Citrix ShareFile
can help your business
meet GDPR compliance as
a technology partner.

The General Data Protection Regulation (GDPR), goes into effect on 25 May 2018 across the EU and UK, directing businesses to achieve a high level of data protection and protect citizens from privacy and data breaches. If your business isn't ready by then, you may face heavy fines — potentially €20 million or more.

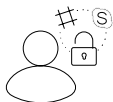

The best preparation for GDPR includes choosing secure tools to protect your data and increase compliance. Here are a few ways that Citrix ShareFile can help lead your compliance efforts:

Easy Data Registration

GDPR compliance preparation requires your business to keep a Data Register with your country's Data Protection Association, as well as locate and classify your data. You can easily identify Personal Data stored in ShareFile with the ShareFile Data Loss Prevention (DLP) integration..

Reliable Personal Data Protections

Article 25 of GDPR requires "Data protection by design and by default." Restrict access to Personal Data stored in ShareFile with our sharing policies, and protect it with authentication measures including 2 Step Verification and SAML integration, password policies, and more.

Automated Recordkeeping

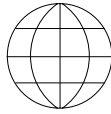

Article 30 states GDPR requirements for "Records of processing activities." ShareFile supports a subset of these requirements through our DLP integration, which audits and tracks scanned files with Personal Data. This includes upload, download, and access activities related to personal data.

Ironclad Data Encryption

Article 32 of GDPR handles “Security of processing” requirements. All of your data stored within ShareFile, including Personal Data, is encrypted at rest. You can also use ShareFile to manage encryption keys, and further encrypt your data through Information Rights Management (IRM).

Intelligent Access Restrictions

ShareFile makes our ShareFile EU control plane available to help support any data sovereignty requirements. We also help provide safeguards to support the transfer of Personal Data to an outside country or international organisation with Information Rights Management (IRM).

EU-US Privacy Shield Certification

Citrix participates in and has certified its compliance with the EU-U.S. Privacy Shield Framework. Citrix has committed to subjecting all personal data received from European Union (EU) member countries, in reliance on the Privacy Shield Framework, to the Framework’s applicable principles.

Model Clauses

Citrix ShareFile supports the Data Processing Addendum (DPA) incorporating EU approved Model Clauses (also known as standard contractual clauses). These clauses were authored by the European Commission.

TrustArc (formerly TRUSTe)

The privacy practices of Citrix ShareFile have been assessed by TrustArc for compliance with Enterprise Privacy Certification.

This document provides a general overview of the EU General Data Protection Regulation (GDPR) and is not intended as and shall not be construed as legal advice. Citrix does not provide legal, accounting, or auditing advice or represent or warrant that its services or products will ensure that Customers or Channel Partners are in compliance with any law or regulation.

Customers and Channel Partners are responsible for ensuring their own compliance with relevant laws and regulations, including GDPR. Customers and Channel Partners are responsible for interpreting themselves and/or obtaining advice of competent legal counsel with regard to any relevant laws and regulations applicable to them that may affect their operations and any actions they may need to take to comply with such laws and regulations.
